

Using our drawing paper

Welkome to Papiertje! / Waldorfpaper
Thank you for your interest / purchase!

Our mission is to encourage drawing at home, school, childcare or any other educational institution.
We will invite children to draw with our waldorf-papers and make drawing activities more meaningful and with more attention.

Drawing activities are relaxing and stimulates children to process their experiences and emotions.
This is important for the development and happiness of every child.
Through the connecting with natural (drawing)materials we increase our well-being

We hope that by the end of 2018, already many children had the changes to make a drawing on our waldorf-paper.
